CIMDR Sangli (India) July
2017–Nov 2020

MASTER OF COMPUTER APPLICATIONS

KLS Gogte Institution of Technology,
Belagavi(India) Jan 2021 - Oct 2023

PROJECTS

Logistic Management System Administration

(Internship at Ekfrazo Technologies, Bengaluru) April 2022 - July 2022

- Website is developed Using Angular and Bootstrap,
- The project is Invented to help the logistic owners and users.
- where many logistic owners provide information regarding the available vehicles.
- User/Customer checks for the vehicles and requests for transportation. Then the owner receives the notification regarding the same. Once the request is approved, confirmation is sent to the users and the owner will assign the item to the customer order, place it in production, and, once shipping has been confirmed, produce an invoice.

D'FOOD STORE

March 2022 - April 2022

- Website is Built Using Angular and Bootstrap.
- In this website user can search and order food.
- The food will be delivered with the help of User Details.

BILLING MANAGEMENT SYSTEM

October 2021 - February 2022

- Project is based on the Windows application.
- Technologies used C#, SAP Crystal Reports, and Microsoft SQL Server Management Studio.
- Here They can also check available stocks, available products, and product prices.
- Admin also can buy products from a dealer. And we also created SAP Crystal Reports for detailed information about Billing Management System For Admin.

KITCHEN TROLLEY WEBSITE

April 2018

- Technologies used in this project HTML, CSS, JAVA (Frontend Development).
- We demonstrated what types of hinges, types of Sliders and other products are used, and showed from where we Order the doors. Also a Gallery for Previous Sites are provided for Reference, Store Location, And Feedback Form.
